

The pillars of La Salle Comtal

1

A LASALLIAN METHODOLOGY

La Salle Comtal School is progressively implementing the NCA program. A pedagogical and pastoral care framework, with its own identity, which presents a new organizational, methodological and evaluative proposal. La Salle Comtal, based on tradition and innovation, wants to be a school that prepares for life, being sensitive to a changing society.

2

ATTENTION TO DIVERSITY

For years we have had a special focus on diversity. We strive to innovate and provide the necessary resources so that all students can be served. We have psychopedagogical counseling, as well as two SIEI supports for children - Primary and Secondary, Reception Class for newly arrived students, multisensory room and professionals in continuous training.

3

WELCOMING AND MULTICULTURAL

We are a welcoming school with more than 30 different nationalities. A situation that has led us to open up to the world and enrich ourselves with the cultural experiences of all our students and their families. It is the will of the school to make the diversity known and, at the same time, those things that unite us in our world. For us, this multiculturalism has become a treasure that makes us unique.

4

SCHOOL COMMUNITY

For us, the school goes beyond its own school timetables, we understand education as an integral experience. An experience that goes through class hours, extracurricular activities, solidarity initiatives, proposals for coexistence and an educational community which has students as its centre.

La Salle Comtal is a publicly-funded private school which offers all the education stages. It is also supported by the Government of Catalonia.

STATEMENT OF PRINCIPLES - OWN CHARACTER

LOOK
BEYOND!

NEW LEARNING CONTEXT (NCA)

It is a pedagogical framework with its own identity, which presents a clear organizational, methodological and evaluative proposal and which gives full meaning to the education of the person by comprehensively addressing their emotional, cognitive, physical, social or spiritual dimensions in the course of the different stages of their development. The student becomes the protagonist of his/her own learning.
